

RESEARCH ANALYST

Permanent Position – CDI

FAT & Associés is a business intelligence consultancy founded in 2010, specialized on the oilseeds, oils and lipids from agriculture to end usages in food, feed, oleochemistry and biofuels.

You will join a small team of experts based in Toulouse, which is performing market analysis and producing private studies to meet clients' requests as well as yearly multi-client studies.

Your responsibilities will include:

- Find, organize, cross-check and consolidate qualitative and quantitative data,
- Identify, connect and interview contacts within the oilseeds value,
- Use quantitative and qualitative data to build mid-term forecasts,
- Update and grow databases,
- Propose and develop new analytical tools and models,
- Write synthetic assessments for the final reports,
- Propose an agenda for the reports and comply it,
- Communicate and display on behalf of FAT & Associés during international events,
- Meet clients and develop prospects.

The ideal candidate would have:

- Scientific background (Master's degree or PhD) with a science (agronomy, food science, chemistry ...) or technical specialization related to FAT & Associés' area of expertise,
- Minimum two years' experience in a consulting company, public or private research/business intelligence institution or within the strategy department of a key player in the value chain,
- Ideally, a good knowledge of the oilseeds, oils and lipids value chain and some understanding of the main issues around it,
- Practical experience with database management tools,
- Great attention to details and a critical approach/ability to pinpoint errors and correct them,
- Very good level of English (written and spoken, closed to bilingual) in a business context plus a second language (Spanish, German, Chinese, Russian ...),
- Team spirit and strong will to support the development of a small company.

Please send your CV and cover letter to fturon@fat-associés.com
